

ANDROID DW VMAX SETUP GUIDE

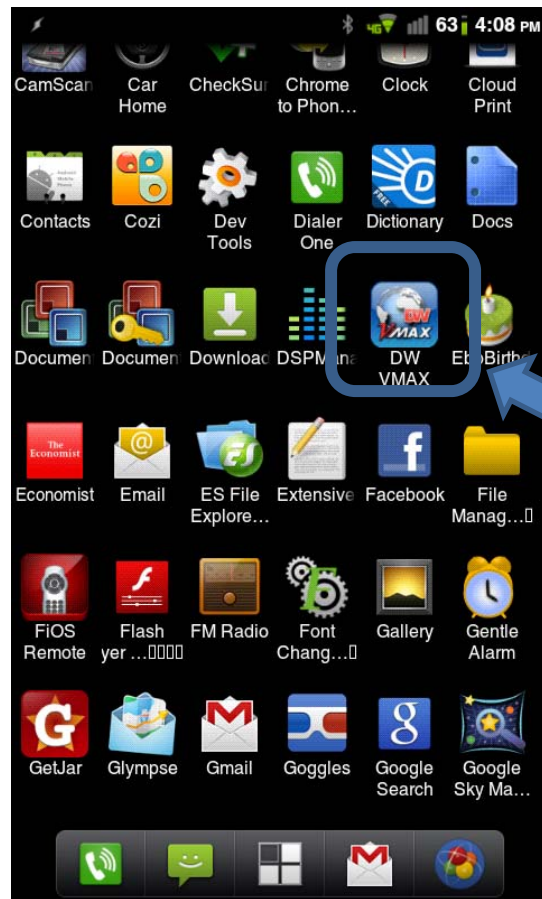

Downloading DW VMAX

The application is free and can be downloaded from Android Market

1. Search "DW VMAX"
2. Install application

3. Go to Menu → DW VMAX. The screen will be black.

4. Press the option button on the cell-phone and select "Add site"

5. Enter site, IP, portal, user ID & password information.

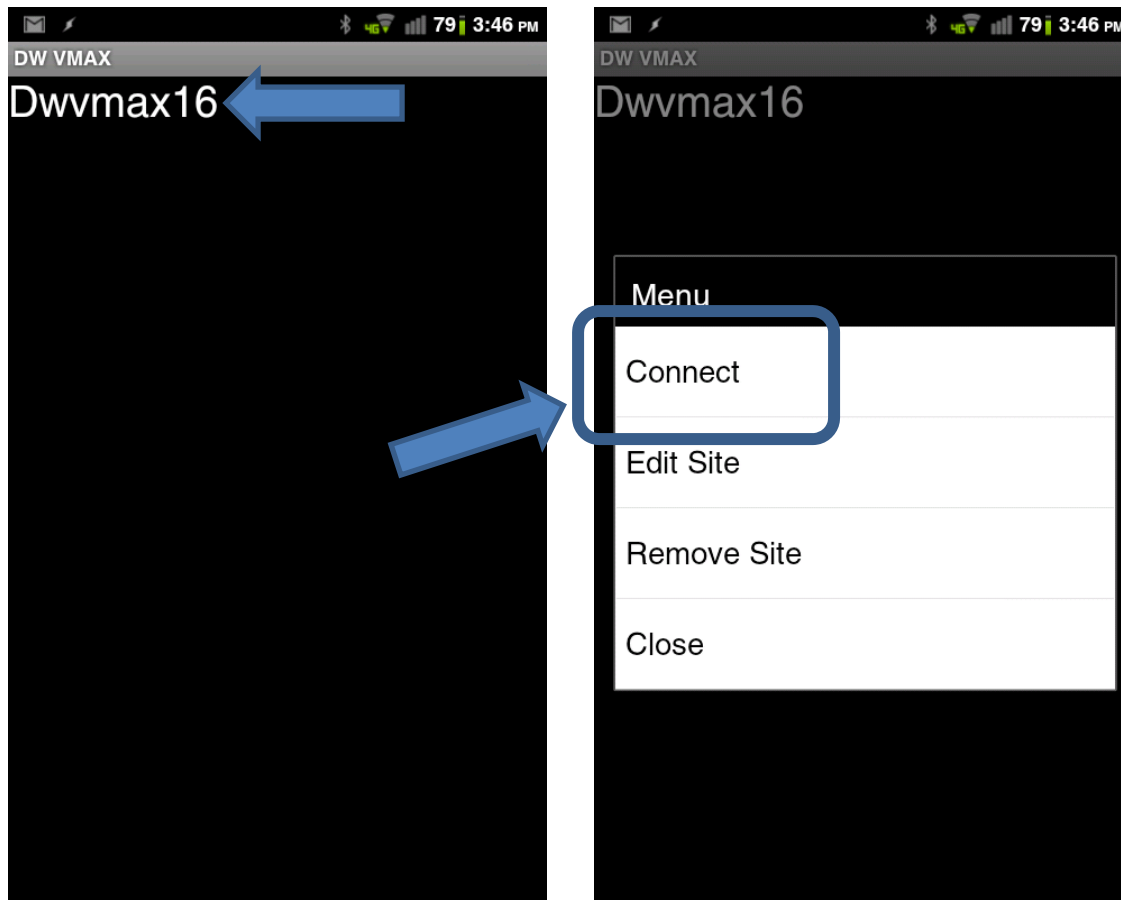

The image shows two screenshots of a mobile application interface for configuring a DW VMAX system. The first screenshot shows the initial form with empty input fields. The second screenshot shows the form with the following values entered:

Field	Value
DVR Type	VMAX
Site Name	Dwvmax16
IP Address	72.243.193.204
Port	9011
User ID	demo
Password	

- Site name: Enter the site name or the private DVR location name
- IP Address: Enter the IP of your personal DW-VMAX system, or the Digital Watchdog VMAX Demo IP
- Port: **9011** (default)
- User ID: admin (default)
- Password: no password

6. Press the option button, and select “save”.

7. The site you have entered should appear on the black screen.

8. Press a long press on the desired network/site name.
9. In the pop-up menu, select “connect”.

10. Once in the desired network, manage your view by selecting the camera number you wish to see.

Select a
specific
camera

Select 1-4
channels to view
simultaneously

Exit VMAX
